Deliver **Engaging Classes** Live or Virtually

Kneura™

Kneura is a **Virtual Classroom Platform** that offers blended learning - a combination of traditional face-to- face and online learning and provides powerful tools for educators to create and deliver lessons (live and online), grade, advise and engage with Learners and achieve extraordinary learning outcomes.

Content Authoring Tools

Multimedia Rich lessons

Learning Objects Repository

Video & Audio Conferencing

Secure Live Classes

Formative Assessments

Create a
Virtual Classroom

Craft Stunning Lessons – Create interesting lesson plans with AI curated content from our Learning Object Repository, and sketch your imagination using smart authoring tools to write and highlight, draw shapes in different backgrounds to create an immersive learning experience.

One-click Share – With a single click on Publish, students will get notified about the lessons shared by their teachers. After publishing, any changes made by the teacher in the lesson plan would automatically reflect, saving the hassle of publishing and downloading different documents.

Blended Learning – Enables teachers to make better use of the limited time by moving their traditional activities into the online world. Teachers share the topics and resources with students before class, encourage them to come prepared with their questions and doubts.

Live Tutoring – With built-in video collaboration and interactive teaching tools, students experience the benefits of face-to-face interaction in a virtual classroom and with the luxury of Teach / Learn from Home. The inclusion of polling and quizzes maximizes the student's participation.

Secure Classes - Kneura enables teachers to set up and manage online activities without any worry of random internet users stumbling across the information. With Datagram Transport Layer Security, we ensure the highest level of security index.

Never Grade Another Sheet – Create assignments a plethora of reliable and engaging tools, auto-grade, and document the academic readiness of the learners, in a fun and engaging way through Q/A, survey, games, resources, and assignments and review their knowledge gain on daily basis.

Centralized Ecosystem – With cloud storage, accessing the resources become possible with a few clicks. Admin can track attendance, knowledge index of a student or class, and overall academic metrics of the institution. Through Broadcast Message, any announcement can be made to entire institution in one go.

Kneura on
Any Device

Compatible with most of the operating systems and works on different devices and apps.
