Components for Setup

01

In the box

TutorPlus Live

Micro USB Cable

Stylus with Charging Cable

Power Cable

Power Adapter

Not in the box

HDMI Cable

Measuring Tape

Marker

Display Panel

Computer

Installation

02

Basic Guidelines

Take care not to place the panel in direct sunlight.

For a seamless experience, the display panel has to be mounted firmly. If needed, add some extra padding (ex: sponge) for support between the panel and the wall to prevent it from shaking while writing.

Rotate the knob on the screw mount anticlockwise and unscrew the screw mount halfway.

Remove the protection film from the velcro tape on the clip mount. Keep the device on the centre of display. Make sure the device is not leaning forward or falling behind. Press the clip firmly on back of display.

Rotate the knob on the screw mount clockwise to tighten the mount, keeping the device locked in place.

Connectivity

03

Port Description

Connections: PC Touch mode

Setting Up

04

Installing Drivers

Go on: gotutorplus.com/downloads and download

- 📄 EyeRIS Drivers (for interactivity)
- 📄 BrightClass Teach Software (for white-boarding)

Run the downloaded files, setup window will guide you to Install the softwares

Calibration

Launch EyeRIS drivers, click on **Manual Calibration** and use Stylus to calibrate

Calibration continued...

Stylus

05

Description

Charging

Note: Styluses needs to be charged before using for the first time.

To charge Stylus use the charging cable and connect the stylus to PC
